### New Financial System Dynamics AX

UTi has a full suite of system software solutions capable of providing you with your required management information and track and trace needs. All the software solutions are owned and developed by UTi and, as such, we have the ability to tailor a solution to meet any client specific requirements.

We pride ourselves on our use of the latest in logistics technology and software to ensure smooth, reliable delivery of shipments. We are excited to inform you that we have finalised the replacement of our financial system with Dynamics AX, an enterprise resource planning (ERP) solution that is simple to use.

Enterprise resource planning (ERP) systems provide benefits of real-time capabilities and seamless communication for businesses. The new system will allow us to deliver value faster, take advantage of business opportunities, and drive user involvement and innovation across the organisation.

We dedicated valuable resources and time in order to ensure that the system was implemented as smoothly as possible, and without any implications to our clients. However, as with any new system, a few bugs and teething problems have arisen. We are working tirelessly to fix these and apologise if you have been impacted in any way.

Thank you for your patience in this regard. We are positive that you will experience all the benefits of the system, as all of our IT solutions have been designed and implemented with our clients and 'Ease of Use' in mind.

If you have any further questions, please feel free to contact your Credit controller.

Yours sincerely

Greg Saffy
